### Profile

I am a fast learner with a deep interest in Web Development and Programming. Acquiring new skills and keeping myself updated excites me. I am always open to learning new things and I like connecting with new people.

### Education

**Bachelor of Computer Application (BCA)**, Vellore Institute of Technology  
CGPA - 8.35

Vellore

**Higher Secondary Certificate**, Maharishi Vidya Mandir (CBSE)  
Percentage - 86.6%

**Secondary School Certificate**, Maharishi Vidya Mandir (CBSE)  
Percentage - 86.2%

### Professional Experience

**Facebook Ads Manager Intern**, Break the Code

During my internship, I honed my collaborative skills by actively working alongside team members, while also mastering effective client communication and management techniques. This experience equipped me with the ability to seamlessly coordinate with colleagues and engage confidently with clients.

### Skills

#### Programming Languages :

JavaScript , HTML /CSS , NodeJS , TypeScript  
,Java

#### Technologies/Frameworks:

Express, React, Postman, AWS , MongoDB,  
Material Ui.

### Projects

**Course Selling Website**, (MongoDB,Express,Node,React, JWT, Material UI)

- Leveraged MongoDB as the database for efficient course management.
- Architected the backend with Express and Node.js, implementing server- side logic for smooth data handling.
- Created an intuitive and responsive user interface using React and Material UI, enhancing the app's visual appeal and user experience.
- Implemented secure user authentication with JWT, ensuring data privacy and secure course access.

#### Todolist App

- Technologies Used: Node.js, Express.js, RESTful APIs, File Handling, User Authentication
- Todo App Backend: Created RESTful API endpoints for managing todos with in-memory storage.
- File Server Backend: Implemented file listing and content delivery endpoints using 'fs' module.

- Authentication Server: Extended server for secure user authentication with signup, login, and protected routes.
